

HTTP Error 500.21 - Internal Server Error Handler "PageHandlerFactory-Integrated" has a bad module "ManagedPipelineHandler" in its module list

Published 10/18/2012 by [Raghav Khunger](#)

While working with IIS today I started getting the following error:

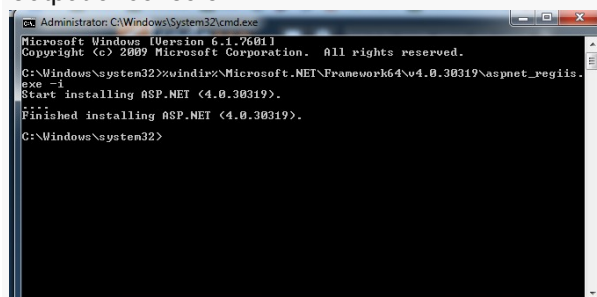

```
HTTP Error 500.21 - Internal Server Error
Handler "PageHandlerFactory-Integrated" has a bad module "ManagedPipelineHandler" in its module list
```

The reason I found was that my ASP.NET framework got corrupted. The solution was to reinstall it. I did via command prompt with the following command:

```
%windir%\Microsoft.NET\Framework64\v4.0.30319\aspnet_regiis.exe -i
```

Output of console:

After running the above command my problem was solved.
