

No "pause" option in latest Call of Duty Ghosts offline multiplayer (Squads)

Published 11/16/2013 by [Vivek Thakur](#)

This is an off-topic post. I had to blog about it because Activision deserves to be slammed for not providing the pause option when playing "extinction" or "squad" offline. Call of Duty series always have this interesting survival mode, where waves upon waves of bots try to put you and your partner down which makes it an interesting offline multiplayer mode.

But with the launch of the latest CoD Ghosts, I was shocked to know that there is no way to pause the game, which means if you start playing once, and get an important phone call, there will be no option to pause the game and come back to it when free. Very disappointing indeed. Hopefully Activision releases a patch asap to fix this silly bug.
