

# Using F10 F11 keys in VMware Fusion in MAC OS

Published 9/22/2015 by [Raghav Khunger](#)

If you are facing issues while using native F10, F11 keys while debugging Visual Studio in VMware Fusion you need to switch the functionality of your Mac's function keys so as retain the original functionality of the Function keys.

1. Launch "System Preferences".
2. Click on the "Keyboard" icon.
3. Click on the checkbox saying "Use all F1, F2, etc, keys as standard function keys".

If you want to use the special features printed on each key now you have to hold down the 'fn' function key.
