

Find Date after a given week(s) or month(s)

Published 11/4/2009 by [Vijendra Shakya](#)

Here I am discussing to find date after a given week or months.
For example I want to find the date after 1 week or 2 months from today.
Find date after 2 week or 2 months then we can achieved this as like:

```
DateTime dateTime = DateTime.Now.AddDays(14);  
//we can also do this as DateTime.Now.AddDays(2*7)  
  
DateTime dateTime1 = DateTime.Now.AddMonths(2);
```

The output will be:

```
11/18/2009 3:59:43 PM  
1/4/2010 3:59:43 PM
```

If we want only date part then we can achieved this as like:

```
string dt = DateTime.Now.AddDays(2*7).ToShortDateString();  
  
string dt1 = DateTime.Now.AddMonths(2).ToShortDateString();
```

The output will be:

```
11/18/2009  
1/4/2010
```
