

Hide and show controls using jquery

Published 4/30/2009 by [Shaitender Singh](#)

Here is code snippet :-

```
<script type="text/javascript">
$(document).ready(function(){
    $('#box').hide();

    $('#show').click(function(){
        $('#box').show('slow');return false;
    });

    $('#hide').click(function(){
        $('#box').hide('slow');
        return false;
    });
});
</script>
```

Html code -

```
<a href="#" id="show">Show the text box</a>
<div id="box">
<a href="#" id="hide">Hide the text box</a>
<input id="txt" value="This is the box that will be shown and hidden"
type="text" style="border-style:solid;height:20px;width:350px;font-weight:bold"/></div>
```

hope this will help you. thanks
