

Post-Build task failing in VS 2015

Published 10/29/2016 by [Raghav Khunger](#)

I was having the following command in my post build event command line:

```
"$(MSBuildBinPath)\msbuild.exe" "$(ProjectDir)YUICompress.msbuild" /p:ConfigurationName=$(ConfigurationName"
```

and it was giving the following error:

'C:\Program' is not recognized as an internal or external command,

The solution was actually pretty easy, I just had to surround the call in quotes.

```
"$(MSBuildBinPath)\msbuild.exe" "$(ProjectDir)YUICompress.msbuild"  
/p:ConfigurationName=$(ConfigurationName
```
