

git pull ! [rejected] (would clobber existing tag)

Published 28 days ago by [Raghav Khunger](#)

While pulling the latest code form the upstream/master branch if you are getting the following message:

```
! [rejected] latest -> latest (would clobber existing tag)
```

The solution was to go to VS Code Settings, search for "Git tags":

and uncheck the "Git: Pull tags" checkbox. Unchecking that checkbox will no longer give you that warning and you will be able to pull now.
