

Make sure you configure your user.name and user.email in git

Published 19 days ago by [Raghav Khunger](#)

If you are getting the following message while committing your commits in VSCode:

Make sure you configure your user.name and user.email in git

You can run these in Terminal

```
git config --global user.email "you@example.com"
git config --global user.name "Your Name"
```

```
raghav@ubuntu:~$ git config --global user.email "raghav.khunger@gmail.com"
raghav@ubuntu:~$ git config --global user.name "Raghav Khunger"
raghav@ubuntu:~$
```

After running the above commands restart the VSCode and you will not face the above issue after that.
