

Alert Box From ASPX Code-Behind Code

Published 1/20/2010 by [mohit kumar](#)

In this blog I will explain how to open a JavaScript alert from Code-behind file.

I want to show 'Welcome' alert on page load. Below is my code:-

```
protected void Page_Load(object sender, EventArgs e)
{
    Response.Write("<script>alert('Welcome')</script>");
}
```

Happy Coding:)
