

Failure [INSTALL_PARSE_FAILED_INCONSISTENT_CERTIFICATES]

Published 1/5/2014 by [Raghav Khunger](#)

If you are facing the following issue **Failure [INSTALL_PARSE_FAILED_INCONSISTENT_CERTIFICATES]** while running your android app with phone connected with USB device then you need to uninstall the app first from the device and rerun the android solution from the editor.

```
DEVICE SHELL COMMAND: pm install -r "/data/local/tmp/co
pkg: /data/local/tmp/
Failure [INSTALL_PARSE_FAILED_INCONSISTENT_CERTIFICATES
```

After doing the above mentioned steps I was able to run the app on device:

```
Success

Launching application: com
DEVICE SHELL COMMAND: am start -n '
Starting: Intent { cmp= }
```
